## What is ARA?

It's a software protocol that integrates plugins into your DAW, making them the fastest real-time processing tools available.

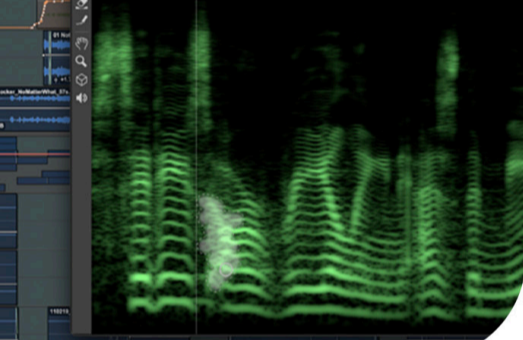

### 2024.10 WaveLab Go by Steinberg

WaveLab Go by Steinberg Resynthesize corrupted audio. Access detailed mid-side editing. Monitor loudness levels across entire files, instantly.

### 2024.6 RX 11 Spectral Editor by iZotope

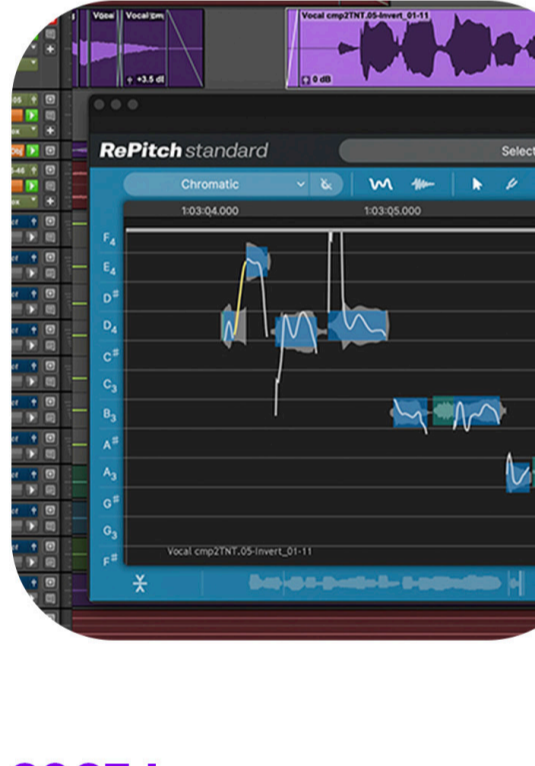

Remove background noise and problematic frequencies like clicks and hums. Resynthesize audio with the industry-standard spectral editor.

Extract vocals from tracks. Edit with a hyper-detailed spectrogram. Explore layer-based editing.

### 2024.6 RePitch Elements by SynchroArts

Get perfectly tuned vocals that don't sound processed or artificial, while never compromising the feel or vibe of the performance.

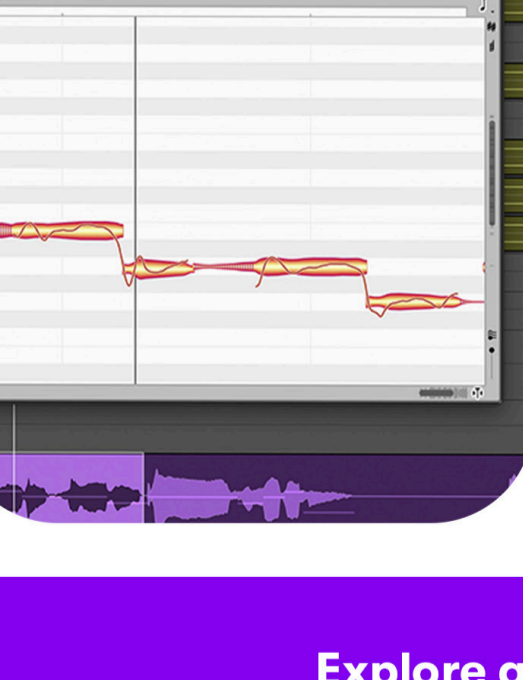

### 2025.4 DynAssist Lite by NoiseWorks

Automatically apply gating, breath reduction, and sibilance control to your vocals.

### 2024.12 Acoustica Essentials by Acon Digital

Edit and restore audio with transparent waveform and spectrogram editing, or with DeClick, DeClip, and DeHum.

### Melodyne Essential by Celemony

Make every note pitch perfect with the industry-standard software for altering the timing, vibrato, pitch, and more with unmatched clarity.

Explore all ARA plugins

## More features you're missing

- > Kontakt 8 Player with exclusive instruments only for Pro Tools
- > New arpeggiators, chord generators, and more MIDI plugins
- > Export sessions as Media Composer readable files
- > Copy + paste MIDI to (and from) Sibelius
- > Control MIDI quantization from the Edit window
- > Create perfect MIDI performances with playlists

Update + get more MIDI

### 2025.4 TATAT by K-Devices

Generate endless MIDI streams, control chaos, and kickstart new ideas. Or use it as an arpeggiator.

### 2024.10 BLEASS Arpeggiator

Go beyond traditional arpeggiation and create polyrhythms, polyphony, and a variety of highly customizable patterns.

### 2024.10 SEQUND Lite 510k

Go wild and generate polyrhythms, groovy basslines, and complex melodies with a blended sequencer-arpeggiator.

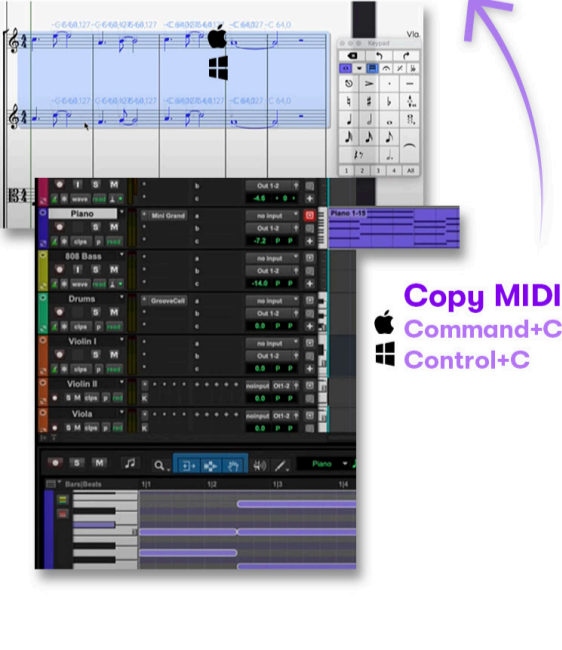

## New MIDI Features

### 2024.10 MIDI Playlists

Record multiple takes and save them all to a single playlist. Then compare, audition, combine, compile, or cast-away the ones you like and don't.

Paste MIDI  
Option+Shift+V  
Alt+Shift+V

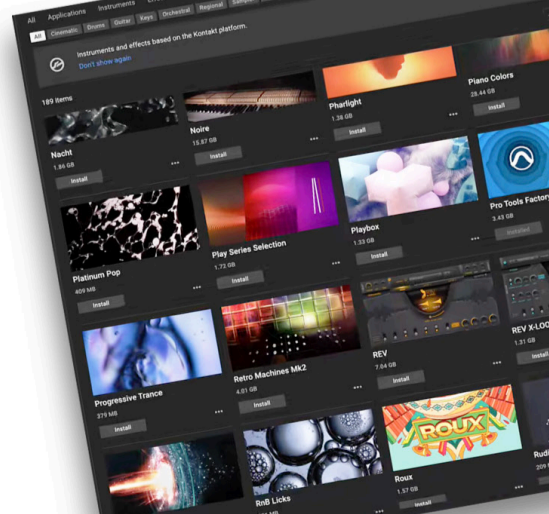

Copy MIDI  
Command+C  
Control+C

### 2024.3 Copy + paste MIDI between Pro Tools and Sibelius

Start a composition in Sibelius and build-up the production in Pro Tools, or vice versa. Combine your production and composing tools into one mega workflow.

### 2024.3 Kontakt 8 Player

Kickstart ideas with a symphony of possibilities at your fingertips. Access exclusive sounds only for Pro Tools. Or sample, flip, and reimagine sounds and loops with the Leap sampler.

# Welcome to Sibelius

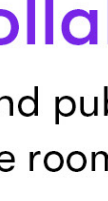

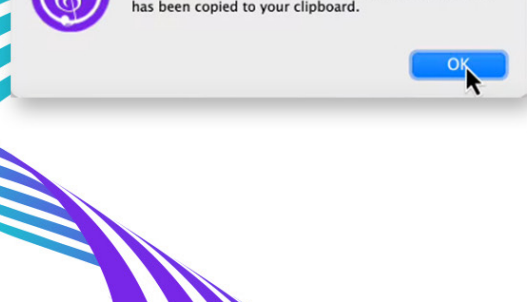

Discover the tools to bring your ideas to life.

**Capture inspiration wherever it strikes.**

Write music on iPad, iPhone, Android, and desktop, and continue composing the same project on a different device.

**Cloud Sharing**

## Never miss a beat during collaboration.

View, share, write, and publish projects around the world (or across the room) with **Cloud Sharing**.

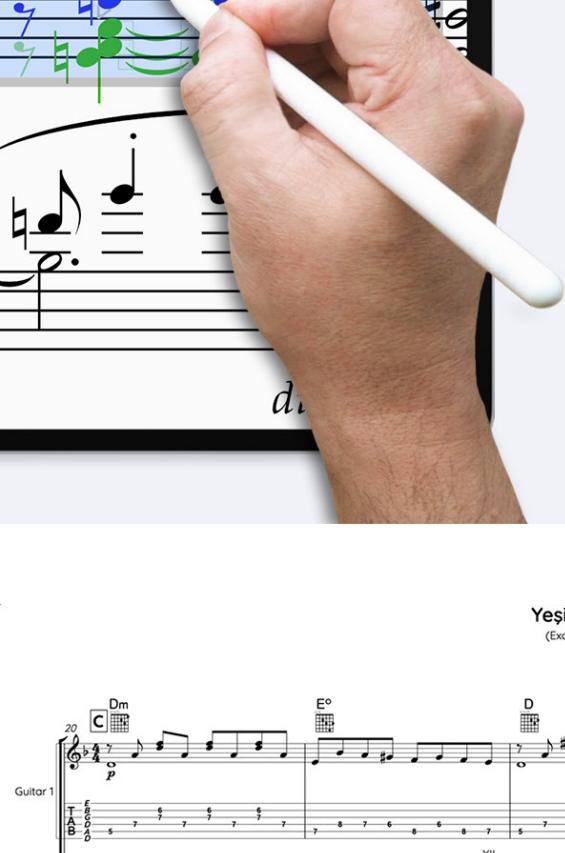

**Join the Avid ecosystem of creativity.**

With the ability to copy and paste MIDI to and from Pro Tools, composers can work seamlessly with producers to bring big ideas to life.

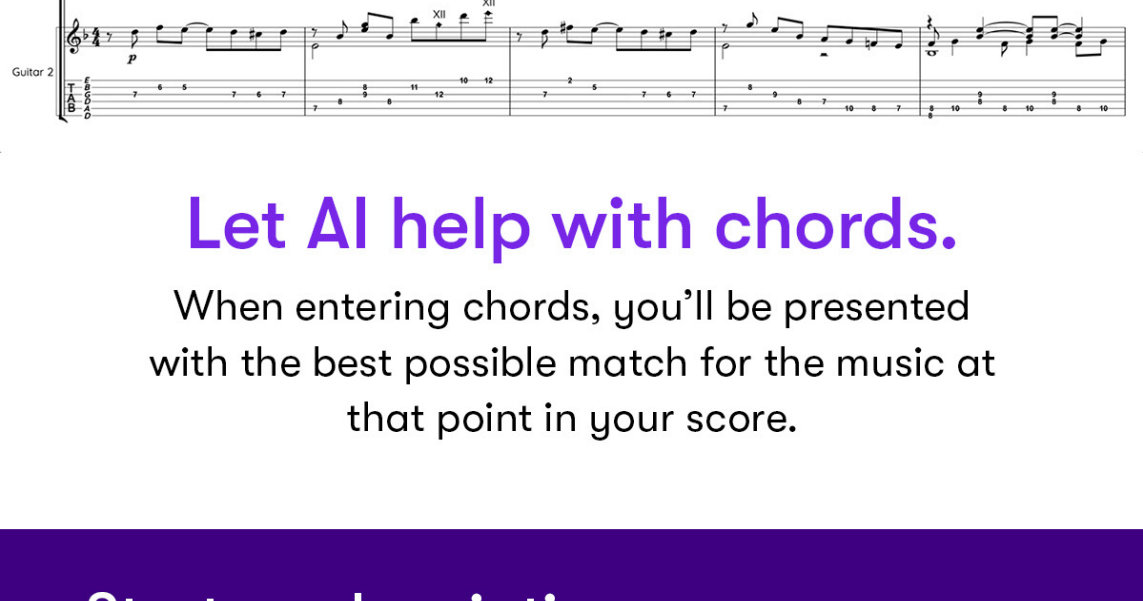

## Speak the language of the pros.

More professional composers, engravers, and arrangers choose Sibelius than any other software.

## Write at the speed of thought.

Enter notes with the on-screen Keypad, a MIDI keyboard, your computer keyboard, or with an Apple Pencil or stylus.

### Let AI help with chords.

When entering chords, you'll be presented with the best possible match for the music at that point in your score.
